

*//WAP to find number is even or odd using ternary operator*

```
#include<stdio.h>
int main()
{
    int num;

    printf("\n\t Enter num = ",num);
    scanf("%d",&num);

    printf("\t Num = %d",num);

    (num%2 == 0)?printf("\n\t Entered Number is
Even"):printf("\n\t Entered Number is odd") ;
}
```
